

VIDEO SCRIPT FOR VISUALLY IMPAIRED CANDIDATES – ADAPTABLE!

Goal: The educate employers on your ability to get professional work done, in the same time as anyone else.

SCRIPT:

How will I be able to do my job if you give me a piece of paper or a purchase order?

- So, truth be told, I operate like everyone else, and I have the metrics to prove it.
- It's actually very easy. I use my CCTV tool to magnify any documents.
- And when it comes to detail, I can see everything (probably even better than most). I can see the most intricate details to ensure we're acquiring the right products and materials.
- I can also use this tool to fill out forms and stay in communication with local and global teams.
- Not to mention, I've mastered some key AI tools to help me operate efficiently.

Will it cost you anything to bring me onto the team?

- I'm enrolled in a Vocational Rehabilitation program, and *they* provide the needed equipment for me to do my job. So, there are no additional costs that you would incur.

Do you need to do anything special for me? How long does it take me to complete assigned work?

- Nothing special is required, I can read emails and documents. I also have software that speaks to me, so I don't miss a beat. I would develop a system with you so we can flow seamlessly in our day-to-day workings.

What can I really see?

- Well, I can't see the details of your face, but I can see like I'm underwater. It's like a haze for me, but I am acutely aware of my surroundings.

- I'm eager to contribute as a qualified professional. Some of my past co-workers have called to say *things just aren't as bright without me*. I have energy for days and I'm ready to get back to meaningful work.

What can I do better than most?

- Attention to detail. Investigation and problem solving. Not to mention building incredibly strong relationships so businesses can continue to grow.

There are reasonable human beings in this world. People and employers that can see someone's value and ability to contribute to the workplace. But fear of the unknown is very real, and I wanted to put your mind was at ease with the decision to pursue a working relationship with me. Thank you for watching this video.

p.s. Personal philosophy or catchphrase (closing graphic with still picture of you)

TOOLS: Can use Canva and an iPhone/Android to build or Zoom and a Webcam, YouTube

Goal: The educate employers on your ability to get _____ work done in the same time as anyone else.
